

Multi-Agent AI vs. Single-Model AI

Why Multi-Agent Deliberation Is the Future of Enterprise AI

Decision Crisis Immunization Infrastructure

WHY NOW

THE PROBLEM

Single-Model AI Is a Black Box — Enterprises Need Deliberation

- Single LLM outputs have no internal checks, dissent, or structured reasoning
- Enterprise decisions require multiple perspectives — legal, financial, operational
- Regulators demand explainability — single model predictions are not explainable
- Group decision theory shows multi-perspective deliberation produces better outcomes
- No platform offers structured multi-agent deliberation with evidence

THE SOLUTION

How Datacendia Solves This

The Council™ deploys 50+ specialized agent presets that debate, dissent, and decide — with cryptographic proof of every step.

Key Use Cases

- **Strategic decisions** 4-12 agents deliberate
- **Risk assessment** with formal dissent
- **Compliance review** multi-agent debate
- **Investment committee** confidence scoring
- **Incident response** War Room mode

INVESTOR THESIS

Why This Is a Compelling Investment

Multi-agent AI is the next paradigm after single-model. Enterprises need deliberation, not chatbot answers. First platform with formal dissent tracking and crypto evidence.

Platform Proof

- **205K+** passing tests
- **156** validated API endpoints
- **50+** agent presets
- **23** jurisdictions covered
- **4** deployment modes
- **Live** at app.datacendia.com

INVESTOR — THEME

FOUNDER

Stuart Rainey — Founder & CEO

- 7 years as Senior Data Analyst at TCS, embedded with PGIM Fixed Income (\$800B+ AUM)
- Built data infrastructure for regulated investment decisions at institutional scale
- M.S. in Big Data Analytics
- Author of the DDGI framework — ISO/IEC JTC 1/SC 42 standards track
- NVIDIA Inception member

Why This Founder

Built the exact data infrastructure that financial institutions need for AI governance — at one of the world's largest asset managers.

THE ASK

\$1.5M Pre-Seed — \$7M Pre-Money Valuation

What's Built

205K+ passing tests. 156 validated API endpoints. Live production platform.

Traction

2 warm enterprise intros (financial institution, Big 4 channel). NVIDIA Inception.

Use of Funds

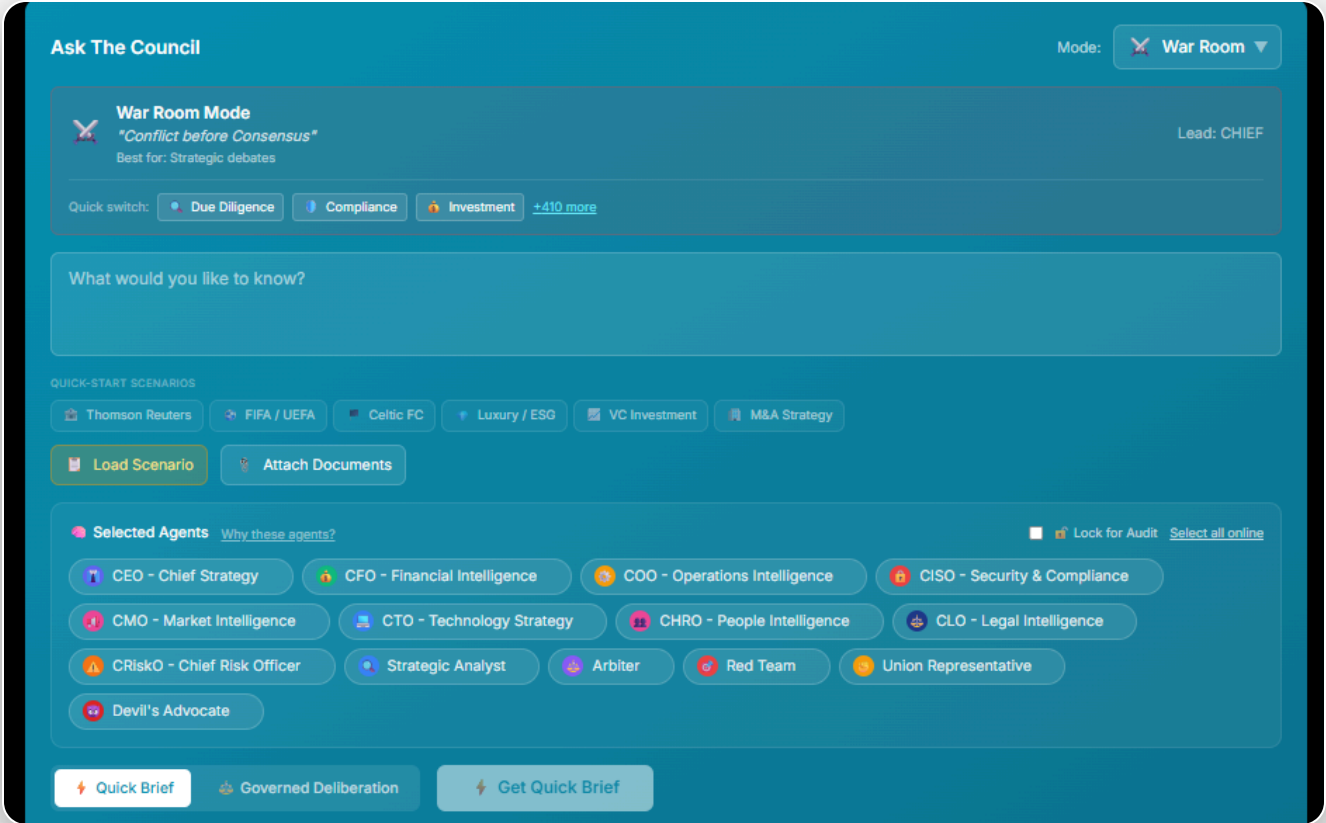

GTM hiring, SOC 2 Type II certification, first enterprise pilots.

\$8.5M post-money · 21.5% dilution · Engineering risk resolved — GTM-stage investment.

MULTI-AGENT DECISION ENGINE

Decisions Made by Specialized AI Agents — Not One Black Box

- Each decision is deliberated by role-specific agents: CFO, CISO, Legal, Strategy, Risk, and more
- Every agent provides a confidence score and reasoning — dissenting views are preserved, not hidden
- War Room, Governed Deliberation, and Quick Brief modes adapt to the urgency and stakes of each decision

Every Decision Tracked with Confidence, Agents, and Full Evidence Chain

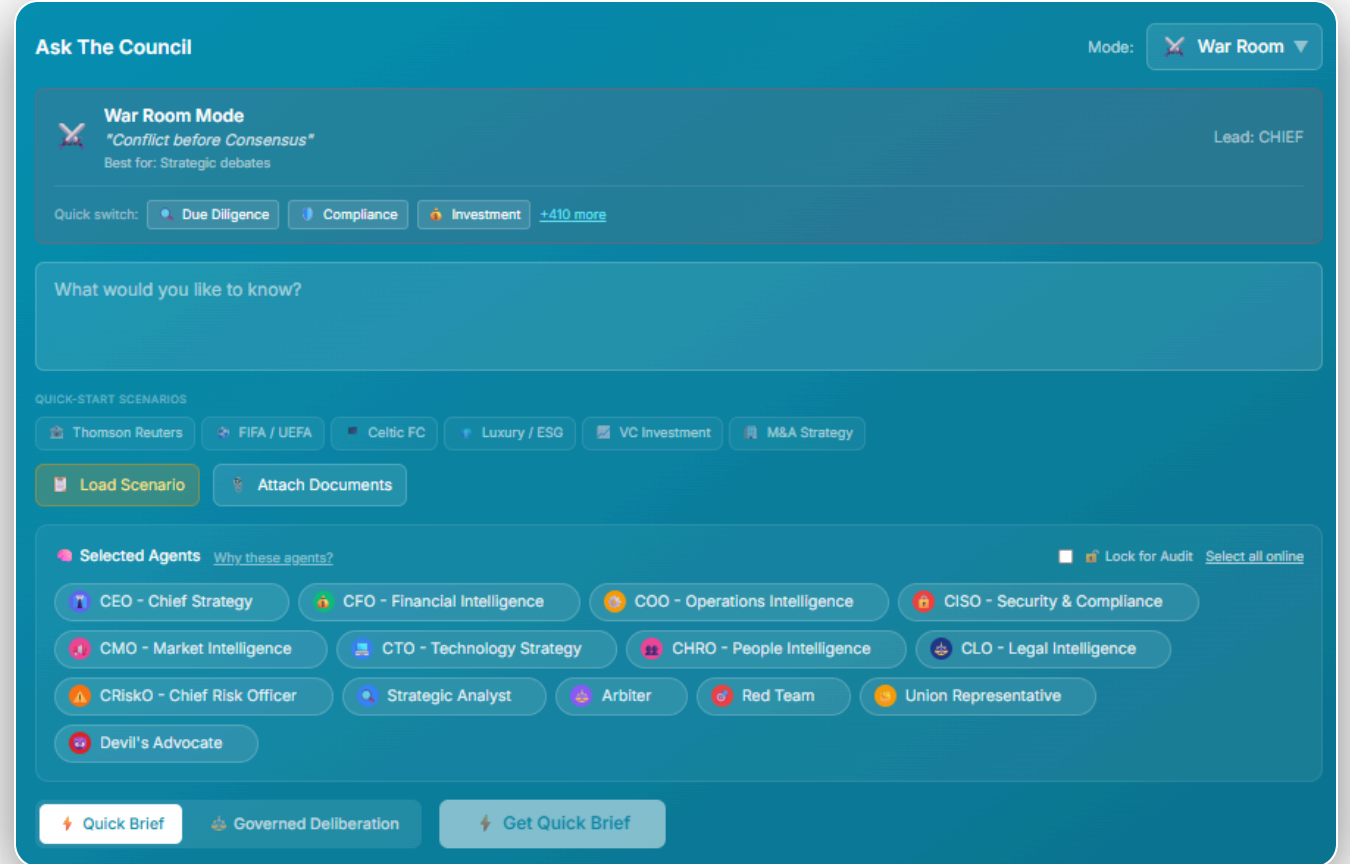

- Complete decision history — searchable by status, confidence level, agent participation, and date
- Each decision links to the full deliberation record: who participated, what they recommended, and why
- Regulators and auditors can trace any decision back to its evidence and reasoning in seconds

 Every Decision Tracked with Confidence, Agents, and Full Evidence Chain

MULTI-AGENT DECISION ENGINE

Decisions Made by Specialized AI Agents — Not One Black Box

- Each decision is deliberated by role-specific agents: CFO, CISO, Legal, Strategy, Risk, and more
- Every agent provides a confidence score and reasoning — dissenting views are preserved, not hidden
- War Room, Governed Deliberation, and Quick Brief modes adapt to the urgency and stakes of each decision

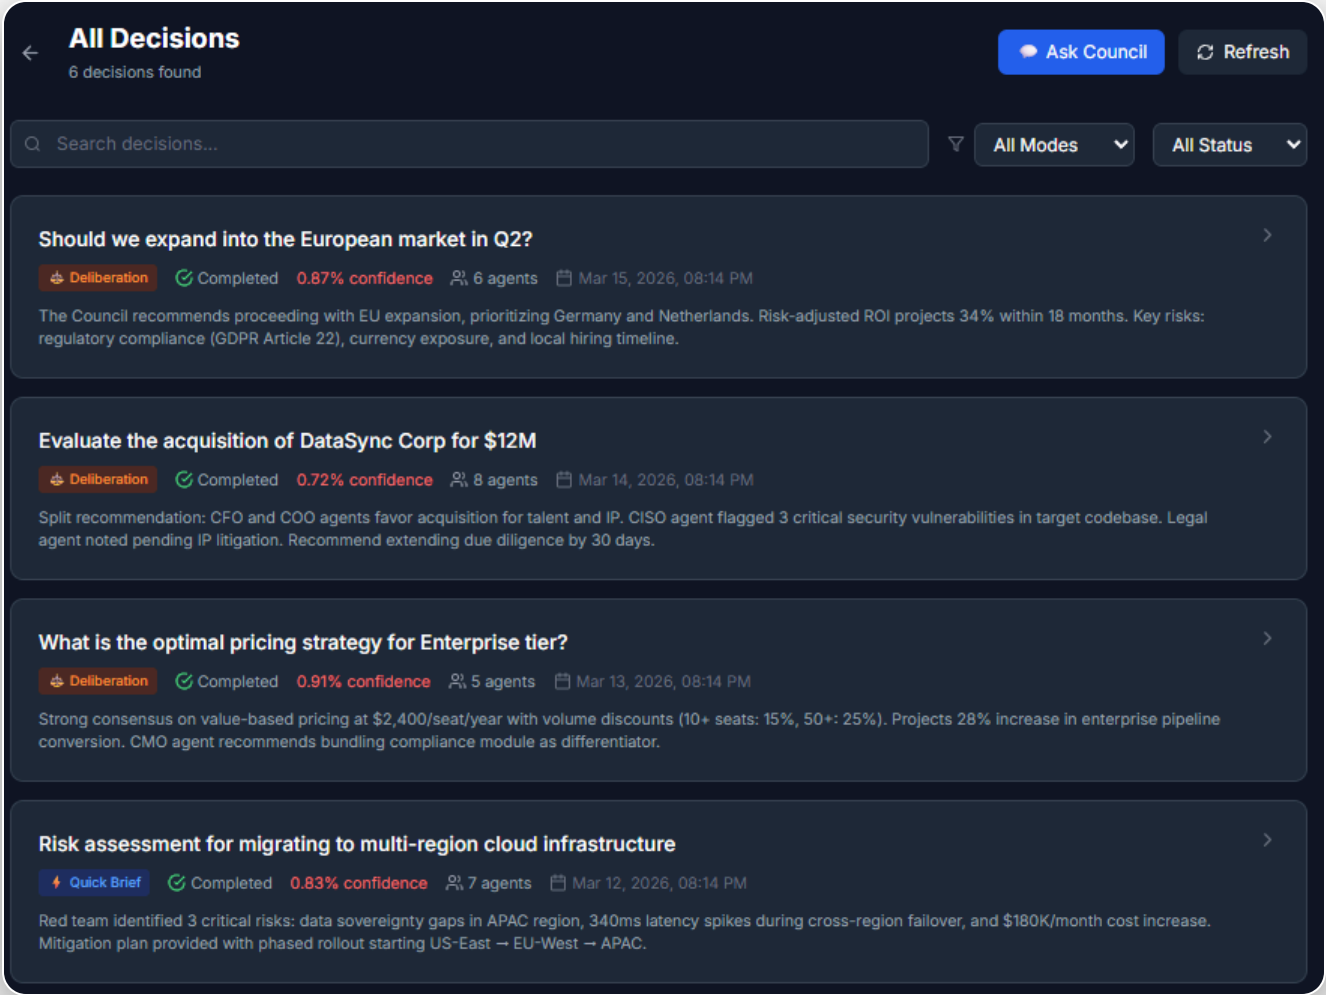

DECISION AUDIT TRAIL

Every Decision Tracked with Confidence, Agents, and Full Evidence Chain

- Complete decision history — searchable by status, confidence level, agent participation, and date
- Each decision links to the full deliberation record: who participated, what they recommended, and why
- Regulators and auditors can trace any decision back to its evidence and reasoning in seconds
