

Legal & AmLaw 200

AI Governance for Legal Decision-Making and Client Advisory

WHY NOW

THE PROBLEM

Legal AI Creates Liability Without Accountability

- Lawyers using AI for research and drafting without verifying reasoning
- Courts sanctioning attorneys for AI-generated citations that don't exist
- ABA Model Rules require lawyers to be competent in technology they use
- EU AI Act requires human oversight for AI in justice and legal contexts
- Client advisory decisions influenced by AI with no documented rationale
