

Energy & Utilities

AI Governance for Critical Infrastructure Decision-Making

WHY NOW

THE PROBLEM

Energy AI Decisions Affect Millions — With Zero Accountability

- Grid management AI making load-shedding decisions with no audit trail
- NERC CIP standards require documented decision processes for critical infrastructure
- EU AI Act classifies energy AI as high-risk requiring human oversight
- NIS2 Directive mandates cybersecurity and operational resilience for energy
- Renewable integration decisions using AI with no documented rationale

THE SOLUTION

How Datacendia Solves This

On-premises or air-gapped deployment with specialized agents for grid operations, regulatory compliance, risk, and sustainability.

Key Use Cases

- **Grid optimization with documented rationale**
- **Renewable integration analysis**
- **NERC CIP evidence generation**
- **Asset lifecycle investment decisions**
- **Emergency response with dissent tracking**

INVESTOR THESIS

Why This Is a Compelling Investment

Critical infrastructure is explicitly high-risk under EU AI Act. Energy companies must demonstrate AI accountability. Sovereign deployment means data never leaves utility networks.

Platform Proof

- **205K+** passing tests
- **156** validated API endpoints
- **50+** agent presets
- **23** jurisdictions covered
- **4** deployment modes
- **Live** at app.datacendia.com

DATAACENDIA

INVESTOR — INDUSTRY

FOUNDER

Stuart Rainey — Founder & CEO

- 7 years as Senior Data Analyst at TCS, embedded with PGIM Fixed Income (\$800B+ AUM)
- Built data infrastructure for regulated investment decisions at institutional scale
- M.S. in Big Data Analytics
- Author of the DDGI framework — ISO/IEC JTC 1/SC 42 standards track
- NVIDIA Inception member

Why This Founder

Built the exact data infrastructure that financial institutions need for AI governance — at one of the world's largest asset managers.

THE ASK

\$1.5M Pre-Seed — \$7M Pre-Money Valuation

What's Built

205K+ passing tests. 156 validated API endpoints. Live production platform.

Traction

2 warm enterprise intros (financial institution, Big 4 channel). NVIDIA Inception.

Use of Funds

GTM hiring, SOC 2 Type II certification, first enterprise pilots.

\$8.5M post-money · 21.5% dilution · Engineering risk resolved — GTM-stage investment.
