

AI Governance Market Creation

Creating a New Category — Not Competing in an Existing One

WHY NOW

THE PROBLEM

AI Governance Is a New Category — No Incumbent Owns It

- GRC platforms handle compliance workflow — not AI decision evidence
- AI providers deliver models — not governance infrastructure
- Data platforms handle data — not decision accountability
- EU AI Act, DORA, EO 14110 create a new mandatory category
- First mover in mandatory category captures disproportionate value

THE SOLUTION

How Datacendia Solves This

Decision Crisis Immunization Infrastructure — at the intersection of AI, compliance, and enterprise decisions. Complements existing vendors, doesn't compete.

Key Use Cases

- Complements GRC with evidence generation
- Complements AI providers with governance layer
- Complements data platforms with decision layer
- New regulatory budget not reallocation
- Platform ecosystem ISVs and SIs
