WHY REDPOINT VENTURES

Why Datacendia Aligns with Redpoint Ventures

Infrastructure and application layers. Strong in data platforms and developer tools. Global with active China fund.

Your Thesis → Our Mission

Redpoint's infrastructure wins (Snowflake, HashiCorp, Twilio) show they understand platform layers that become essential. AI governance is the next essential layer.

Snowflake

Twilio

HashiCorp

Netflix

Redpoint backed Snowflake, HashiCorp, and Twilio — foundational infrastructure layers. Datacendia is the AI governance layer: cryptographic proof of every AI decision, deployed anywhere.

THE PROBLEM

Enterprise AI Has No Accountability Layer

- AI systems make high-stakes decisions with no audit trail, no evidence, and no dissent tracking
- EU AI Act (enforcement 2025–2026) mandates governance for high-risk AI — penalties up to €35M or 7% of global revenue
- DORA (in effect since Jan 2025) requires operational resilience documentation for all AI systems in financial services
- No existing platform provides cryptographic proof of AI-assisted decisions
- Enterprises face regulatory risk with every AI deployment — and have no solution

THE SOLUTION

Multi-Agent Deliberation with Cryptographic Evidence

- Multi-agent deliberation with role-specific AI agents (CFO, CISO, Legal, Strategy, Risk, and more)
- Cryptographic decision evidence — Ed25519 signatures, Merkle trees, RFC 3161 timestamps
- Sovereign deployment — Cloud, Private Cloud, On-Premises, and Air-Gapped
- EU AI Act, DORA, GDPR, HIPAA compliance mapping across 23 jurisdictions
- Zero-copy data architecture — data never leaves customer infrastructure
- Open-source core (Apache 2.0) with enterprise features
