WHY QED INVESTORS

Why Datacendia Aligns with QED Investors

Fintech specialist founded by Capital One co-founder. Deep financial services expertise and regulatory understanding.

Your Thesis → Our Mission

QED's Capital One DNA means deep understanding of financial regulation. DORA (in effect since Jan 2025) and the EU AI Act now mandate AI governance for every financial institution — and no incumbent solves this.

Portfolio Adjacency

- Nubank
- Klarna
- SoFi
- CreditKarma
- Remitly

Nubank, Klarna, SoFi, and CreditKarma all deploy AI for lending and credit decisions. Each faces growing regulatory demand for explainability and audit evidence. Datacendia is the governance infrastructure QED's portfolio companies need today.

THE PROBLEM

Enterprise AI Has No Accountability Layer

- AI systems make high-stakes decisions with no audit trail, no evidence, and no dissent tracking
- EU AI Act (enforcement 2025–2026) mandates governance for high-risk AI — penalties up to €35M or 7% of global revenue
- DORA (in effect since Jan 2025) requires operational resilience documentation for all AI systems in financial services
- No existing platform provides cryptographic proof of AI-assisted decisions
- Enterprises face regulatory risk with every AI deployment — and have no solution

THE SOLUTION

Multi-Agent Deliberation with Cryptographic Evidence

- Multi-agent deliberation with role-specific AI agents (CFO, CISO, Legal, Strategy, Risk, and more)
- Cryptographic decision evidence — Ed25519 signatures, Merkle trees, RFC 3161 timestamps
- Sovereign deployment — Cloud, Private Cloud, On-Premises, and Air-Gapped
- EU AI Act, DORA, GDPR, HIPAA compliance mapping across 23 jurisdictions
- Zero-copy data architecture — data never leaves customer infrastructure
- Open-source core (Apache 2.0) with enterprise features
