WHY NVIDIA VENTURES

Why Datacendia Aligns with NVIDIA Ventures

NVIDIA's strategic investment arm. Backs AI companies that expand GPU adoption and the NVIDIA ecosystem.

Your Thesis → Our Mission

Datacendia is already an NVIDIA Inception member. As enterprises adopt AI at scale, they need governance infrastructure that proves every AI decision is accountable. That governance layer drives GPU demand — every deliberation runs inference.

CoreWeave

Recursion

Cohere

CoreWeave provides compute, Cohere provides models, Recursion applies AI to discovery. Datacendia adds what's missing: the accountability layer that makes enterprise AI deployable in regulated industries. More governed AI = more enterprise adoption = more GPU demand.

THE PROBLEM

Enterprise AI Has No Accountability Layer

- AI systems make high-stakes decisions with no audit trail, no evidence, and no dissent tracking
- EU AI Act (enforcement 2025–2026) mandates governance for high-risk AI — penalties up to €35M or 7% of global revenue
- DORA (in effect since Jan 2025) requires operational resilience documentation for all AI systems in financial services
- No existing platform provides cryptographic proof of AI-assisted decisions
- Enterprises face regulatory risk with every AI deployment — and have no solution

THE SOLUTION

Multi-Agent Deliberation with Cryptographic Evidence

- Multi-agent deliberation with role-specific AI agents (CFO, CISO, Legal, Strategy, Risk, and more)
- Cryptographic decision evidence — Ed25519 signatures, Merkle trees, RFC 3161 timestamps
- Sovereign deployment — Cloud, Private Cloud, On-Premises, and Air-Gapped
- EU AI Act, DORA, GDPR, HIPAA compliance mapping across 23 jurisdictions
- Zero-copy data architecture — data never leaves customer infrastructure
- Open-source core (Apache 2.0) with enterprise features
