

ENTERPRISE AI GOVERNANCE

Make Every AI Decision Auditable, Explainable, and Defensible

→ 14 AI agents deliberate on your data — with cryptographic proof of every step. Zero-copy architecture means your data never leaves your database.

THE CHALLENGE

Your Enterprise Faces an AI Accountability Gap

- AI decisions are black boxes — no audit trail, no explainability for regulators
- Single-model risk — one hallucination becomes a compliance violation or business loss
- Data sovereignty concerns — cloud AI tools copy your sensitive data
- Regulatory pressure mounting — EU AI Act, DORA, US AI Executive Order all demand AI governance
- Board-level visibility gap — executives can't see how AI reached its conclusions
- Regulatory fines for unexplainable AI (2023)
- Of enterprises cite AI explainability as top concern
- AI-influenced decisions by 2030 with no audit trail

The Council™ — AI Boardroom, Not a Chatbot

- "Should we approve this acquisition?" — "Is this compliant with EU AI Act?" — "What's our risk exposure on this portfolio?"
- CEO, CFO, CISO, Risk, Legal, CTO, Red Team + 7 more agents analyze from their domain. Independent analysis prevents groupthink.
- Recommendation, confidence scores, dissenting views, evidence trail, and cryptographic hash chain. Hand it to your auditor or regulator.
- The difference: Your board doesn't accept one person's opinion — why accept one AI model's? Datacendia gives you the rigor of a boardroom debate with the speed of AI and the evidence chain of a courtroom.

PRICING

Transparent, Procurement-Ready

- Recommended entry point: Start with a 90-day Pilot (\$50K) on a single strategic decision. If the Council doesn't surface 3+ risks you missed, we refund the pilot fee. Zero risk to evaluate.

COMPLIANCE

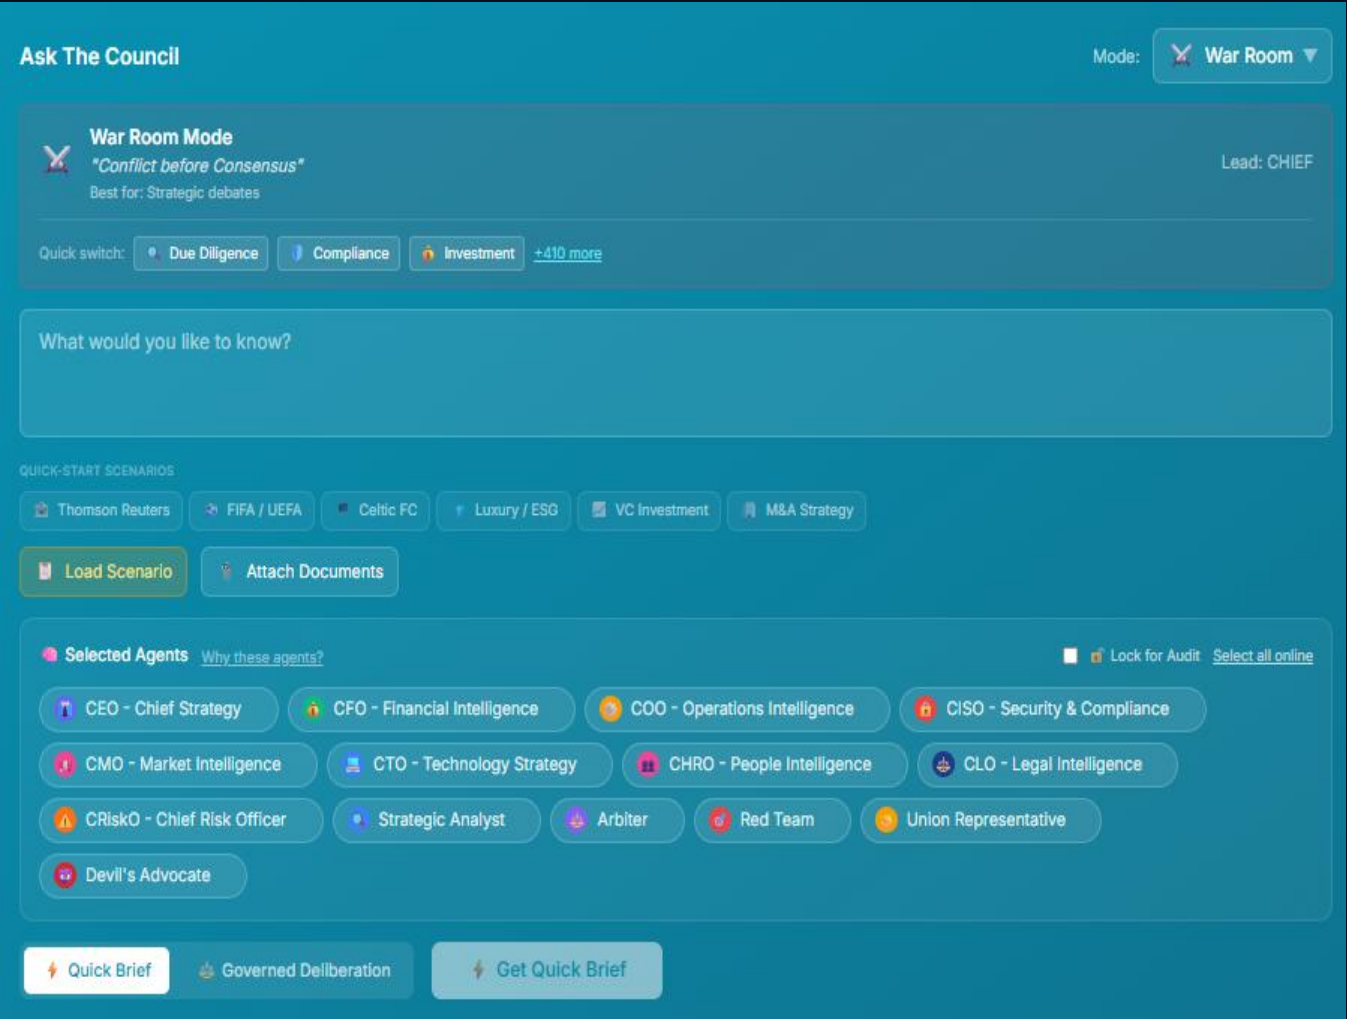

Built for Regulated Industries

- Aligned — DPA available
- Control-Ready Architecture
- Controls Aligned — BAA available
- Explainability-native design
- Why compliance matters commercially: Every certification unlocks a market segment. SOC 2 is table stakes for enterprise SaaS. HIPAA unlocks healthcare (\$4T). FedRAMP unlocks federal (\$100B+ IT). Datacendia's architecture is designed for all of them simultaneously.

MULTI-AGENT DECISION ENGINE

Decisions Made by Specialized AI Agents

- Role-specific agents: CFO, CISO, Legal, Strategy, Risk
- Confidence scores and reasoning — dissent preserved
- War Room, Governed, and Quick Brief modes

Every Decision Tracked with Full Evidence Chain

- Complete searchable decision history
- Full deliberation records linked to each decision
- Trace any decision back to evidence in seconds
