THE PROBLEM

Manufacturing AI Lacks Decision Traceability

- Production decisions influenced by AI with no documented reasoning
- Quality management systems require auditable decision processes (ISO 9001)
- EU AI Act applies safety requirements to AI in industrial settings
- Supply chain disruptions need rapid, accountable decision-making
- Recall investigations have no AI decision lineage to examine

THE SOLUTION

How Datacendia Solves This

Specialized manufacturing agents (Operations, Quality, Supply Chain, Risk, Finance) deliberate on production and supply chain decisions with full evidence trails.

Key Use Cases

- Production optimization with quality/cost tradeoffs
- Supply chain risk analysis
- ISO 9001-compliant decision evidence
- Recall investigation with decision replay
- Capital investment structured deliberation

Why This Is a Compelling Investment

Manufacturing is adopting AI rapidly but lacks governance tooling. ISO 9001 already requires auditable decisions. EU AI Act adds AI-specific requirements. First-mover in a massive industrial vertical.
