AI Platforms w/ Retail Decision
Evidence

THE PROBLEM

Retail AI Affects Consumers Without Transparency

- Pricing algorithms make consumer-impacting decisions with no explainability
- GDPR Art. 22 gives consumers right to explanation of automated decisions
- EU AI Act requires transparency for AI interacting with consumers
- CCPA/CPRA mandates disclosure of automated decision-making
- Recommendation engines lack accountability frameworks

THE SOLUTION

How Datacendia Solves This

Auditable AI decision-making for pricing, personalization, and supply chain — GDPR-compliant evidence for every consumer-impacting decision.

Key Use Cases

- Dynamic pricing with documented rationale
- Personalization with explainability evidence
- Supply chain multi-agent analysis
- Fraud detection decision evidence
- GDPR compliance for data subject requests

Why This Is a Compelling Investment

GDPR Art. 22 already requires explanation for automated decisions. EU AI Act adds transparency mandates. Every retailer using AI needs governance tooling.
