THE PROBLEM

Enterprise AI Governance Requires Trust — Black Box Vendors Fail

- Enterprises demand transparency into governance platforms themselves
- Vendor lock-in unacceptable for sovereign or classified deployments
- Security teams require source code review before deploying
- Traditional GRC vendors offer closed-source black boxes
- Open-source builds developer trust and evaluation pipelines

THE SOLUTION

How Datacendia Solves This

Apache 2.0 community edition for evaluation and audit. Enterprise features (advanced agents, sovereign patterns, premium support) drive commercial revenue.

Key Use Cases

- Community edition free evaluation
- Pilot conversion \$50K money-back
- Enterprise department-to-company rollout
- Government source code escrow
- Partner ISV/SI integrations

Why This Is a Compelling Investment
