THE PROBLEM

Platform Businesses Compound — Point Solutions Don't

- More agents = more decision types = more departments served
- More jurisdictions = more regulatory coverage = more geographies
- More connectors = more data sources = easier integration
- Open-source community contributes agents, connectors, frameworks
- Each deployment improves the platform for everyone

THE SOLUTION

How Datacendia Solves This

A platform, not point solution. Agents, jurisdictions, and connectors compound. Open-source community accelerates the flywheel.

Key Use Cases

- Agent marketplace third-party (roadmap)
- Jurisdictional expansion community-contributed
- Connector ecosystem ISV integrations
- Decision templates industry-specific
- Knowledge compounding improves decisions

Why This Is a Compelling Investment
