THE PROBLEM

AI Creates a New Attack Surface -- Governance Is Defense

- AI decisions are a new attack vector -- adversarial inputs, prompt injection, model poisoning
- No existing security tool provides AI decision integrity verification
- Cryptographic signing creates tamper-evident decision records
- TPM 2.0 provides hardware-rooted trust for AI evidence
- Zero-copy architecture eliminates data exfiltration surface

THE SOLUTION

How Datacendia Solves This

Datacendia provides AI decision integrity -- cryptographic evidence that decisions have not been tampered with, signed with customer-owned keys on customer infrastructure.

Key Use Cases

- Decision integrity verification
- Tamper-evident audit trails
- Hardware-rooted trust attestation
- Zero-copy data protection
- Air-gapped security deployment

Why This Is a Compelling Investment

Cybersecurity funds see the next threat surface. AI governance is defensive infrastructure. Cryptographic evidence, TPM attestation, and zero-copy create a security-first platform.
