Competitors w/ Full Accountability

THE PROBLEM

What You're Facing Today

- AI recommendations are a black box — no one knows why
- Board demanding AI governance and accountability
- Employees don't trust AI-generated recommendations
- No way to explain AI decisions to regulators
- Cannot replay past AI recommendations to verify correctness
- AI outputs inconsistent and unexplainable

WHAT WE BUILD

Decision Crisis Immunization Infrastructure

- Multi-agent deliberation — 50+ specialized agent presets
- Cryptographic audit trail — immutable evidence
- Zero-copy architecture — data never leaves your DB
- Sovereign deployment — air-gapped to cloud
- Not a chatbot. A system of specialized intelligences that debate, dissent, and decide — with cryptographic proof of every step.
- 50+ agent presets (CFO, CISO, Risk, Strategy, Legal) deliberate on your data. You get a boardroom debate, not a chatbot answer.
- Every decision, vote, dissent — hashed, timestamped, exportable. When the auditor says "prove it," hand them this.

YOUR SOLUTION

How Datacendia Solves This

- Multi-agent deliberation — See every agent's reasoning, not just the answer
- Dissent tracking — Know who disagreed and why
- Decision replay — Reproduce any past decision identically
- Evidence packets — Complete reasoning chain for every recommendation
- Adversarial challenge — Red Team agent attacks every recommendation
- Cryptographic proof — Tamper-evident evidence ledger

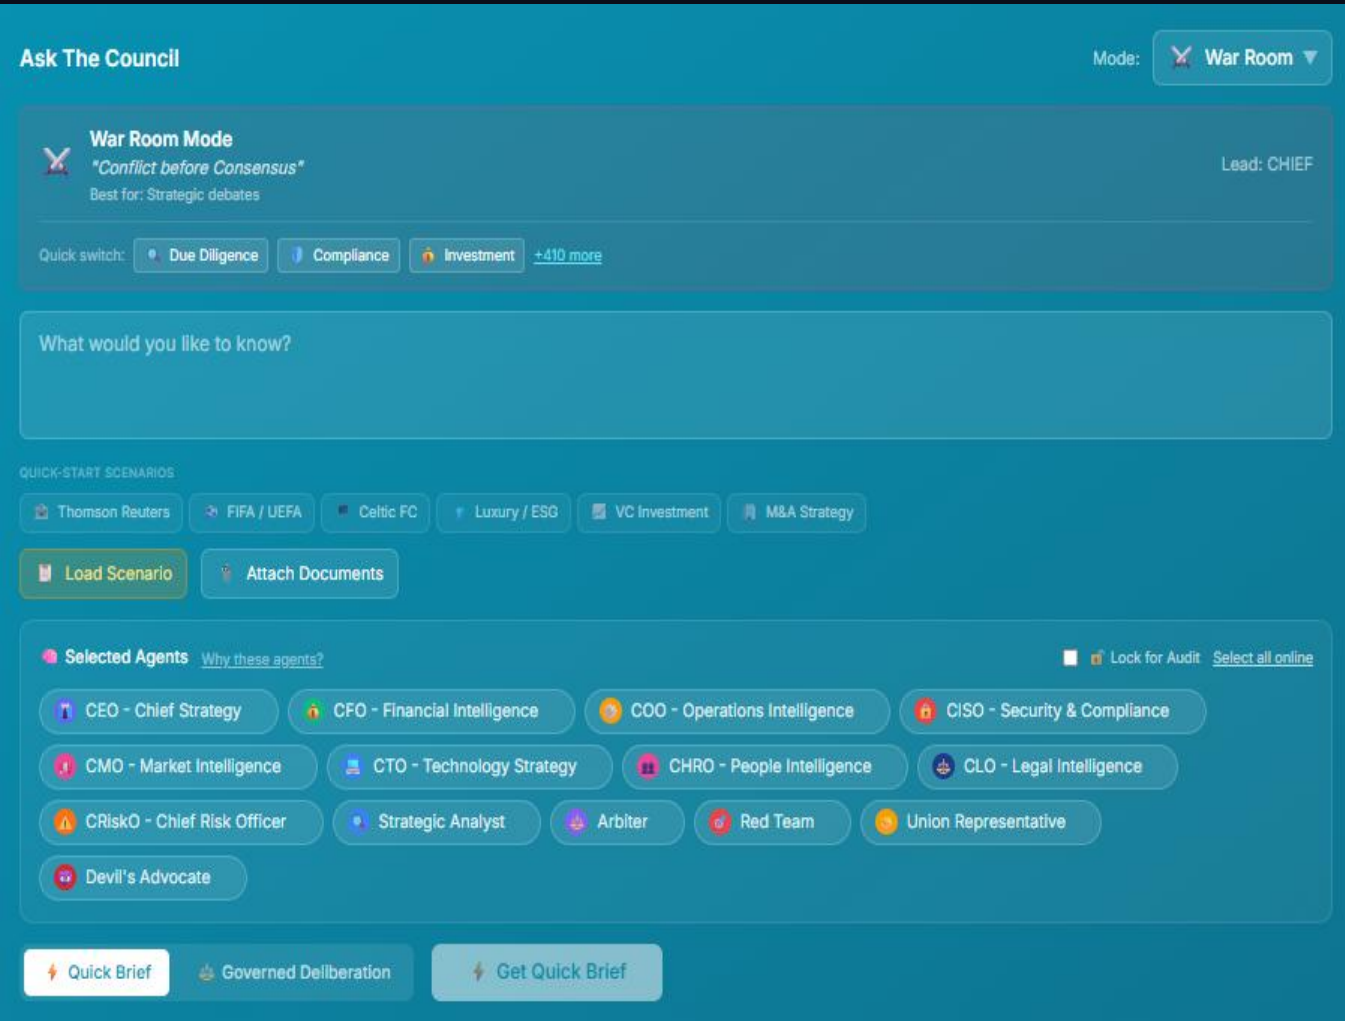

PRICING

Transparent, Procurement-Ready Pricing

MULTI-AGENT DECISION ENGINE

Decisions Made by Specialized AI Agents

- Role-specific agents: CFO, CISO, Legal, Strategy, Risk
- Confidence scores and reasoning — dissent preserved
- War Room, Governed, and Quick Brief modes

Every Decision Tracked with Full Evidence Chain

- Complete searchable decision history
- Full deliberation records linked to each decision
- Trace any decision back to evidence in seconds
