Shadow AI Audit Trail

THE PROBLEM

What You're Facing Today

- Employees using ChatGPT, Copilot, Claude without oversight
- Sensitive data leaking to external AI services
- No audit trail for AI-assisted decisions
- No policy enforcement on AI usage
- Cannot measure AI adoption or costs
- Regulators will demand AI governance you don't have

WHAT WE BUILD

Decision Crisis Immunization Infrastructure

- Multi-agent deliberation — 50+ specialized agent presets
- Cryptographic audit trail — immutable evidence
- Zero-copy architecture — data never leaves your DB
- Sovereign deployment — air-gapped to cloud
- Not a chatbot. A system of specialized intelligences that debate, dissent, and decide — with cryptographic proof of every step.
- 50+ agent presets (CFO, CISO, Risk, Strategy, Legal) deliberate on your data. You get a boardroom debate, not a chatbot answer.
- Every decision, vote, dissent — hashed, timestamped, exportable. When the auditor says "prove it," hand them this.
