AI Platforms w/ Cryptographic
Decision Evidence

THE PROBLEM

Organizations Deploy AI Without Decision Evidence

- High-stakes decisions influenced by AI with no explainability for stakeholders
- EU AI Act requires operational resilience documentation for all AI systems by Jan 2025
- ISO/IEC 42001 mandates auditable risk models — AI black boxes fail this test
- NIST AI RMF requires full audit trails for algorithmic trading decisions
- No widely adopted platform provides cryptographically verifiable decision evidence at the decision level

THE SOLUTION

How Datacendia Solves This

Multi-agent deliberation with cryptographic evidence for every high-stakes decision — regulator-ready proof before the auditor calls.

Key Use Cases

- Decision review with dissent tracking
- Due diligence with full evidence trail
- EU AI Act compliance with automated evidence
- Committee-level structured deliberation
- Regulatory change mapping to operational impact

Why This Is a Compelling Investment
