

DATAACENDIA

Zero-Copy Data Design Partnership

Query in place — your data never leaves your database

Decision Crisis Immunization Infrastructure

Most AI platforms require data copies, ETL pipelines, and data warehouses. We query your data in place. Zero copies. True sovereignty.

WHAT WE BUILD

Decision Crisis Immunization Infrastructure

Not a chatbot. A system of specialized intelligences that debate, dissent, and decide — with cryptographic proof of every step.

- **Multi-agent deliberation** — 50+ specialized agent presets
- **Cryptographic audit trail** — immutable evidence
- **Zero-copy architecture** — data never leaves your DB
- **Sovereign deployment** — air-gapped to cloud

The Council™

50+ agent presets (CFO, CISO, Risk, Strategy, Legal) deliberate on your data. You get a boardroom debate, not a chatbot answer.

Audit Provenance™

Every decision, vote, dissent — hashed, timestamped, exportable. When the auditor says "prove it," hand them this.

ZERO-COPY ARCHITECTURE

Zero-Copy Capabilities

Query In Place

PostgreSQL, MySQL, SQL Server, Oracle,
MongoDB, DB2

No ETL Required

Direct connections, no data movement

16 Connectors

Production-ready database and API connectors

USE CASES

Zero-Copy Use Cases

- **Regulated data analysis** — Analyze PHI/PII without moving it outside controlled systems
- **Cross-database intelligence** — Query across multiple databases without centralization
- **Real-time analysis** — No ETL lag, query current data directly
- **Data sovereignty compliance** — Meet residency requirements by keeping data in place
- **Multi-cloud analysis** — Query data across cloud providers without copying

MULTI-AGENT DECISION ENGINE

Decisions Made by Specialized AI Agents — Not One Black Box

- Each decision is deliberated by role-specific agents: CFO, CISO, Legal, Strategy, Risk, and more
- Every agent provides a confidence score and reasoning — dissenting views are preserved, not hidden
- War Room, Governed Deliberation, and Quick Brief modes adapt to the urgency and stakes of each decision

DECISION AUDIT TRAIL

Every Decision Tracked with Confidence, Agents, and Full Evidence Chain

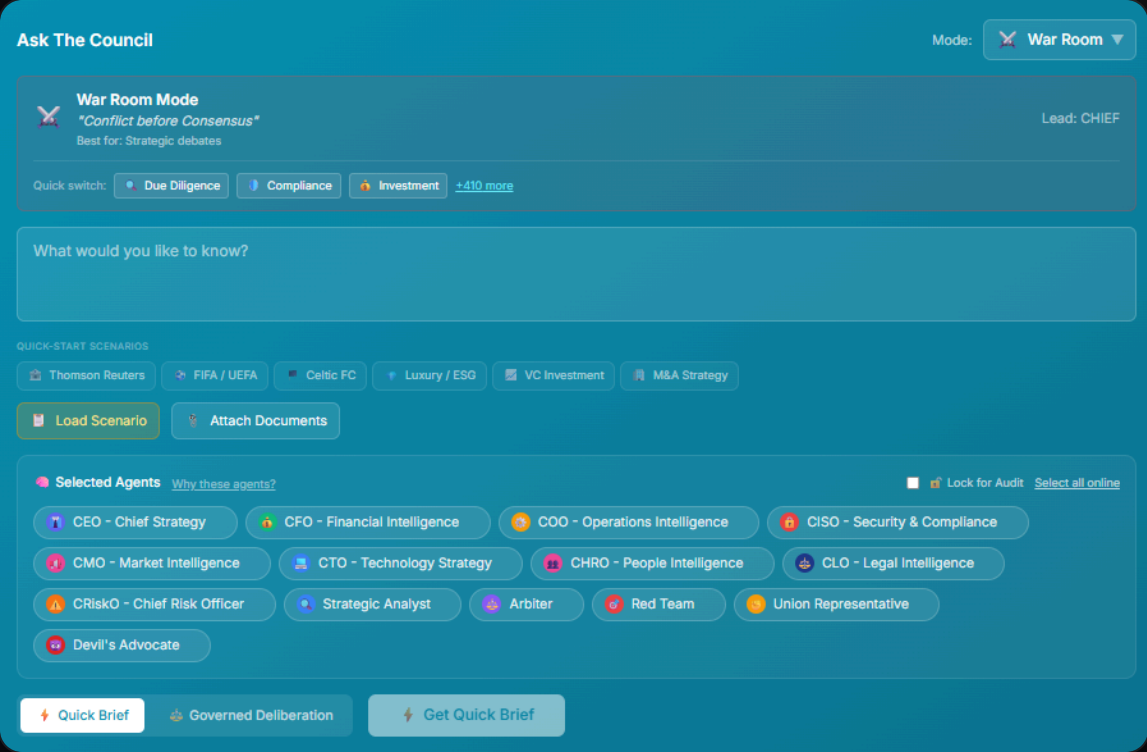

- Complete decision history — searchable by status, confidence level, agent participation, and date
- Each decision links to the full deliberation record: who participated, what they recommended, and why
- Regulators and auditors can trace any decision back to its evidence and reasoning in seconds
