THE PROBLEM

AI Makes Decisions. Nobody Can Explain Them.

Enterprises are deploying AI at scale — but every decision is a black box. When the regulator asks "why did your AI do that?", the answer is silence.

- **\$7.9T** in decisions made using AI by 2030 with no audit trail
- **73%** of enterprises cite AI explainability as top concern (Gartner)
- **\$2.1B** in regulatory fines for unexplainable algorithmic decisions (2023)
- **Zero** platforms provide multi-agent deliberation with cryptographic proof
