WHY BATTERY VENTURES

Why Datacendia Aligns with Battery Ventures

Enterprise technology and open-source software. Track record of backing developer-first platforms that become enterprise standards.

Your Thesis → Our Mission

Battery understands open-source to enterprise conversion. Datacendia's Apache 2.0 community edition builds developer trust → enterprise sales pipeline.

Portfolio Adjacency

- Confluent
- Marketo
- Sprinklr
- Wayfair
- Groupon

Battery backed Confluent from open-source to IPO. Datacendia's Apache 2.0 core builds community trust, developer adoption, and enterprise pipeline — same playbook.

THE PROBLEM

Enterprise AI Has No Accountability Layer

- AI systems make high-stakes decisions with no audit trail, no evidence, and no dissent tracking
- EU AI Act (enforcement 2025–2026) mandates governance for high-risk AI — penalties up to €35M or 7% of global revenue
- DORA (in effect since Jan 2025) requires operational resilience documentation for all AI systems in financial services
- No existing platform provides cryptographic proof of AI-assisted decisions
- Enterprises face regulatory risk with every AI deployment — and have no solution

€35M

Platforms with cryptographic AI decision evidence

2025

EU AI Act high-risk provisions take effect

85%

of Fortune 500 deploying AI (Gartner)

THE SOLUTION

Multi-Agent Deliberation with Cryptographic Evidence

- Multi-agent deliberation with role-specific AI agents (CFO, CISO, Legal, Strategy, Risk, and more)
- Cryptographic decision evidence — Ed25519 signatures, Merkle trees, RFC 3161 timestamps
- Sovereign deployment — Cloud, Private Cloud, On-Premises, and Air-Gapped
- EU AI Act, DORA, GDPR, HIPAA compliance mapping across 23 jurisdictions
- Zero-copy data architecture — data never leaves customer infrastructure
- Open-source core (Apache 2.0) with enterprise features

Key Angle for Battery Ventures
