# EU Digital Markets Act

Decision Evidence Infrastructure for AI Systems

---

Decision Evidence Infrastructure for AI Systems

WHY NOW

EU AI Act

2025–2026 — High-Risk AI  
Governance Mandated

ISO/IEC 42001

AI Management System Certification

NIST AI RMF

Risk Management for Trustworthy AI

0

AI Platforms w/ Cryptographic  
Decision Evidence

THE PROBLEM

# Organizations Deploy AI Without Decision Evidence

- High-stakes decisions influenced by AI with no explainability for stakeholders
- EU AI Act requires operational resilience documentation for all AI systems by Jan 2025
- ISO/IEC 42001 mandates auditable risk models — AI black boxes fail this test
- NIST AI RMF requires full audit trails for algorithmic trading decisions
- No widely adopted platform provides cryptographically verifiable decision evidence at the decision level

THE SOLUTION

# How Datacendia Solves This

Multi-agent deliberation with cryptographic evidence for every high-stakes decision — regulator-ready proof before the auditor calls.

## Key Use Cases

- Decision review with dissent tracking
- Due diligence with full evidence trail
- EU AI Act compliance with automated evidence
- Committee-level structured deliberation
- Regulatory change mapping to operational impact

# Why This Is a Compelling Investment

EU Digital Markets Act is the largest regulated vertical. EU AI Act enforcement creates immediate demand. Only platform providing cryptographic decision evidence — a regulatory requirement with zero incumbent solutions.

## Platform Proof

- ✓ 205K+ passing tests
- ✓ 156 validated API endpoints
- ✓ 50+ agent presets
- ✓ 23 jurisdictions covered
- ✓ 4 deployment modes
- ✓ Live at [app.datacendia.com](https://app.datacendia.com)

FOUNDER

## Stuart Rainey — Founder & CEO

- 7 years as Senior Data Analyst at TCS, embedded with PGIM Fixed Income (\$800B+ AUM)
- Built data infrastructure for regulated investment decisions at institutional scale
- M.S. in Big Data Analytics
- Author of the DDGI framework — ISO/IEC JTC 1/SC 42 standards track
- NVIDIA Inception member

### Why This Founder

Built the data infrastructure and decision workflows required for regulated, high-stakes AI deployments at institutional scale.

THE ASK

# \$1.5M Pre-Seed — \$7M Pre-Money Valuation

## What's Built

205K+ passing tests. 156 validated API endpoints. Live production platform.

## Traction

Active enterprise design-partner conversations (financial institution, Big 4 channel). NVIDIA Inception.

## Use of Funds

First 3 design partners signed, SOC 2 Type II certification, regulatory validation (EU AI Act compliance audit).

\$8.5M post-money · 21.5% dilution · Engineering risk resolved — GTM-stage investment.

| Should we expand into the European market in Q2?                                                                                                                                                                                                |                                                            |             |            |
| Deliberation                                                                                                                                                                                                                                    | Completed 0.87% confidence 6 agents Mar 15, 2026, 08:14 PM |             |            |
| The Council recommends proceeding with EU expansion, prioritizing Germany and Netherlands. Risk-adjusted ROI projects 34% within 18 months. Key risks: regulatory compliance (GDPR Article 22), currency exposure, and local hiring timeline.   |                                                            |             |            |
| Evaluate the acquisition of DataSync Corp for \$12M                                                                                                                                                                                             |                                                            |             |            |
| Deliberation                                                                                                                                                                                                                                    | Completed 0.72% confidence 8 agents Mar 14, 2026, 08:14 PM |             |            |
| Split recommendation: CFO and COO agents favor acquisition for talent and IP. CISO agent flagged 3 critical security vulnerabilities in target codebase. Legal agent noted pending IP litigation. Recommend extending due diligence by 30 days. |                                                            |             |            |
| What is the optimal pricing strategy for Enterprise tier?                                                                                                                                                                                       |                                                            |             |            |
| Deliberation                                                                                                                                                                                                                                    | Completed 0.91% confidence 5 agents Mar 13, 2026, 08:14 PM |             |            |
| Strong consensus on value-based pricing at \$2,400/seat/year with volume discounts (10+ seats: 15%, 50+: 25%). Projects 28% increase in enterprise pipeline conversion. CMO agent recommends bundling compliance module as differentiator.      |                                                            |             |            |
| Risk assessment for migrating to multi-region cloud infrastructure                                                                                                                                                                              |                                                            |             |            |
| Quick Brief                                                                                                                                                                                                                                     | Completed 0.83% confidence 7 agents Mar 12, 2026, 08:14 PM |             |            |
| Red team identified 3 critical risks: data sovereignty gaps in APAC region, 340ms latency spikes during cross-region failover, and \$180K/month cost increase. Mitigation plan provided with phased rollout starting US-East → EU-West → APAC.  |                                                            |             |            |
