WHY SHIELD CAPITAL

Why Datacendia Aligns with Shield Capital

National security technology. Founded by Raj Shah (former head of Defense Innovation Unit). Backs dual-use defense startups.

Your Thesis → Our Mission

Shield Capital understands that defense AI needs governance. Datacendia provides cryptographic accountability for AI decisions in classified environments.

Second Front Systems

Shield Capital (former DIU leadership) backs defense AI. Datacendia provides what defense AI is missing: cryptographic governance with air-gapped deployment and hardware-rooted trust.

THE PROBLEM

Enterprise AI Has No Accountability Layer

- AI systems make high-stakes decisions with no audit trail, no evidence, and no dissent tracking
- EU AI Act (enforcement 2025–2026) mandates governance for high-risk AI — penalties up to €35M or 7% of global revenue
- DORA (in effect since Jan 2025) requires operational resilience documentation for all AI systems in financial services
- No existing platform provides cryptographic proof of AI-assisted decisions
- Enterprises face regulatory risk with every AI deployment — and have no solution

THE SOLUTION

Multi-Agent Deliberation with Cryptographic Evidence

- Multi-agent deliberation with role-specific AI agents (CFO, CISO, Legal, Strategy, Risk, and more)
- Cryptographic decision evidence — Ed25519 signatures, Merkle trees, RFC 3161 timestamps
- Sovereign deployment — Cloud, Private Cloud, On-Premises, and Air-Gapped
- EU AI Act, DORA, GDPR, HIPAA compliance mapping across 23 jurisdictions
- Zero-copy data architecture — data never leaves customer infrastructure
- Open-source core (Apache 2.0) with enterprise features
