WHY KHOSLA VENTURES

Why Datacendia Aligns with Khosla Ventures

Vinod Khosla's fund. Contrarian bets on transformative technology. Strong AI and deep tech thesis with willingness to fund ambitious founders.

Your Thesis → Our Mission

Khosla backed OpenAI — the company that triggered the AI governance wave. As AI scales, governance becomes critical infrastructure. Datacendia is that infrastructure.

Khosla backed OpenAI. The AI revolution they funded now requires governance. Datacendia is the accountability layer for the AI era Khosla helped create.

THE PROBLEM

Enterprise AI Has No Accountability Layer

- AI systems make high-stakes decisions with no audit trail, no evidence, and no dissent tracking
- EU AI Act (enforcement 2025–2026) mandates governance for high-risk AI — penalties up to €35M or 7% of global revenue
- DORA (in effect since Jan 2025) requires operational resilience documentation for all AI systems in financial services
- No existing platform provides cryptographic proof of AI-assisted decisions
- Enterprises face regulatory risk with every AI deployment — and have no solution

THE SOLUTION

Multi-Agent Deliberation with Cryptographic Evidence

- Multi-agent deliberation with role-specific AI agents (CFO, CISO, Legal, Strategy, Risk, and more)
- Cryptographic decision evidence — Ed25519 signatures, Merkle trees, RFC 3161 timestamps
- Sovereign deployment — Cloud, Private Cloud, On-Premises, and Air-Gapped
- EU AI Act, DORA, GDPR, HIPAA compliance mapping across 23 jurisdictions
- Zero-copy data architecture — data never leaves customer infrastructure
- Open-source core (Apache 2.0) with enterprise features
