WHY OPEN SOCIETY FOUNDATIONS

Why Datacendia Aligns with Open Society Foundations

Open, democratic societies. Digital rights, government transparency, and accountability. Combating authoritarian use of technology.

Your Thesis → Our Mission

Open Society combats opaque, authoritarian AI. Datacendia makes AI transparent by design: every decision is evidenced, every dissent preserved, every claim traceable to its source.

Institute for Strategic Dialogue

Open Society fights opaque power. AI is the new opaque power. Datacendia makes AI decisions transparent: cryptographic evidence, preserved dissent, sovereign deployment — accountability infrastructure.

THE PROBLEM

Enterprise AI Has No Accountability Layer

- AI systems make high-stakes decisions with no audit trail, no evidence, and no dissent tracking
- EU AI Act (enforcement 2025–2026) mandates governance for high-risk AI — penalties up to €35M or 7% of global revenue
- DORA (in effect since Jan 2025) requires operational resilience documentation for all AI systems in financial services
- No existing platform provides cryptographic proof of AI-assisted decisions
- Enterprises face regulatory risk with every AI deployment — and have no solution

THE SOLUTION

Multi-Agent Deliberation with Cryptographic Evidence

- Multi-agent deliberation with role-specific AI agents (CFO, CISO, Legal, Strategy, Risk, and more)
- Cryptographic decision evidence — Ed25519 signatures, Merkle trees, RFC 3161 timestamps
- Sovereign deployment — Cloud, Private Cloud, On-Premises, and Air-Gapped
- EU AI Act, DORA, GDPR, HIPAA compliance mapping across 23 jurisdictions
- Zero-copy data architecture — data never leaves customer infrastructure
- Open-source core (Apache 2.0) with enterprise features
