THE PROBLEM

Banks Deploy AI Without Audit Trails

- Credit decisions influenced by AI with no explainability for regulators
- DORA requires operational resilience documentation for all AI systems by Jan 2025
- Basel III mandates auditable risk models — AI black boxes fail this test
- MiFID II requires full audit trails for algorithmic trading decisions
- No existing platform provides cryptographic proof of AI-assisted decisions

THE SOLUTION

How Datacendia Solves This

Multi-agent deliberation with cryptographic evidence for every credit, trading, and risk decision — regulator-ready proof before the auditor calls.

Key Use Cases

- Credit decision review with dissent tracking
- M&A due diligence with full evidence trail
- DORA compliance with automated evidence
- Investment committee structured deliberation
- Regulatory change mapping to P&L impact

Why This Is a Compelling Investment

Green Finance AI is the largest regulated vertical. DORA enforcement creates immediate demand. Only platform providing cryptographic decision evidence — a regulatory requirement with zero incumbent solutions.
