WHY HERO CAPITAL

Why Datacendia Aligns with HERO CAPITAL

AI is eating software. hero-capital's dedicated AI fund backs infrastructure that becomes the default layer for enterprise AI adoption.

Your Thesis → Our Mission

Datacendia is the missing governance layer for enterprise AI — the infrastructure that sits between AI deployment and regulatory compliance. As AI adoption accelerates, every enterprise needs cryptographic proof of AI decisions.

Portfolio Adjacency

- ✓ UK enterprise seed
- ✓ Anyscale
- ✓ Hex
- ✓ dbt Labs
- ✓ Replit

hero-capital has backed the data stack (UK enterprise seed, dbt) and AI infra (Anyscale). Datacendia completes the stack: governance, accountability, and regulatory compliance for every AI decision.

THE PROBLEM

Enterprise AI Has No Accountability Layer

- AI systems make high-stakes decisions with no audit trail, no evidence, and no dissent tracking
- EU AI Act (2025–2026) mandates governance for high-risk AI — penalties up to €35M or 7% revenue
- DORA requires AI operational resilience for financial services by Jan 2025
- No existing platform provides cryptographic proof of AI-assisted decisions
- Enterprises face regulatory risk with every AI deployment — and have no solution

THE SOLUTION

Multi-Agent Deliberation with Cryptographic Evidence

- Multi-agent deliberation with role-specific AI agents (CFO, CISO, Legal, Strategy, Risk, and more)
- Cryptographic decision evidence — Ed25519 signatures, Merkle trees, RFC 3161 timestamps
- Sovereign deployment — Cloud, Private Cloud, On-Premises, and Air-Gapped
- EU AI Act, DORA, GDPR, HIPAA compliance mapping across 23 jurisdictions
- Zero-copy data architecture — data never leaves customer infrastructure
- Open-source core (Apache 2.0) with enterprise features
