WHY ANDREESSEN HOROWITZ (A16Z)

Why Datacendia Aligns with Andreessen Horowitz (a16z)

AI is eating software. a16z's dedicated AI fund backs infrastructure that becomes the default layer for enterprise AI adoption.

Your Thesis → Our Mission

Guido Appenzeller recently said "there's a huge opportunity for startups to create these proxies" with scoped access and trust boundaries. That's exactly what Datacendia is — decision infrastructure where AI agents operate within cryptographic trust boundaries, every action is evidence-logged, and enterprises control exactly what each agent can touch.

Replit

a16z backed the data stack (Databricks, dbt) and AI infra (Anyscale). Datacendia adds the governance layer: cryptographic proof of what each AI agent can access, what it decided, and why. Scoped trust for AI — not a chatbot.

THE PROBLEM

Enterprise AI Has No Accountability Layer

- AI systems make high-stakes decisions with no audit trail, no evidence, and no dissent tracking
- EU AI Act (enforcement 2025–2026) mandates governance for high-risk AI — penalties up to €35M or 7% of global revenue
- DORA (in effect since Jan 2025) requires operational resilience documentation for all AI systems in financial services
- No existing platform provides cryptographic proof of AI-assisted decisions
- Enterprises face regulatory risk with every AI deployment — and have no solution

THE SOLUTION

Multi-Agent Deliberation with Cryptographic Evidence

- Multi-agent deliberation with role-specific AI agents (CFO, CISO, Legal, Strategy, Risk, and more)
- Cryptographic decision evidence — Ed25519 signatures, Merkle trees, RFC 3161 timestamps
- Sovereign deployment — Cloud, Private Cloud, On-Premises, and Air-Gapped
- EU AI Act, DORA, GDPR, HIPAA compliance mapping across 23 jurisdictions
- Zero-copy data architecture — data never leaves customer infrastructure
- Open-source core (Apache 2.0) with enterprise features
