WHY IVP (INSTITUTIONAL VENTURE PARTNERS)

# Why Datacendia Aligns with IVP (Institutional Venture Partners)

Growth-stage enterprise and consumer technology. Backs proven companies scaling from \$10M to \$100M+ ARR.

## Your Thesis → Our Mission

IVP backs enterprise infrastructure at the growth inflection (Datadog, CrowdStrike).  
AI governance is approaching that same inflection as regulations take effect.

## Portfolio Adjacency

Slack

Datadog

CrowdStrike

GitHub

Dropbox

IVP invested at the growth inflection of Datadog, CrowdStrike, and Slack. AI governance is approaching the same inflection — regulations create the forcing function. Datacendia is ready.

THE PROBLEM

# Enterprise AI Has No Accountability Layer

- AI systems make high-stakes decisions with no audit trail, no evidence, and no dissent tracking
- EU AI Act (enforcement 2025–2026) mandates governance for high-risk AI — penalties up to €35M or 7% of global revenue
- DORA (in effect since Jan 2025) requires operational resilience documentation for all AI systems in financial services
- No existing platform provides cryptographic proof of AI-assisted decisions
- Enterprises face regulatory risk with every AI deployment — and have no solution

**€35M**

Max EU AI Act penalty per violation

**0**

Platforms with cryptographic AI decision evidence

**2025**

EU AI Act high-risk provisions take effect

**85%**

of Fortune 500 deploying AI (Gartner)

THE SOLUTION

# Multi-Agent Deliberation with Cryptographic Evidence

- Multi-agent deliberation with role-specific AI agents (CFO, CISO, Legal, Strategy, Risk, and more)
- Cryptographic decision evidence — Ed25519 signatures, Merkle trees, RFC 3161 timestamps
- Sovereign deployment — Cloud, Private Cloud, On-Premises, and Air-Gapped
- EU AI Act, DORA, GDPR, HIPAA compliance mapping across 23 jurisdictions
- Zero-copy data architecture — data never leaves customer infrastructure
- Open-source core (Apache 2.0) with enterprise features
