THE PROBLEM

Single-Model AI Is a Black Box — Enterprises Need Deliberation

- Single LLM outputs have no internal checks, dissent, or structured reasoning
- Enterprise decisions require multiple perspectives — legal, financial, operational
- Regulators demand explainability — single model predictions are not explainable
- Group decision theory shows multi-perspective deliberation produces better outcomes
- No platform offers structured multi-agent deliberation with evidence

THE SOLUTION

How Datacendia Solves This

The Council™ deploys 50+ specialized agent presets that debate, dissent, and decide — with cryptographic proof of every step.

Key Use Cases

- Strategic decisions 4-12 agents deliberate
- Risk assessment with formal dissent
- Compliance review multi-agent debate
- Investment committee confidence scoring
- Incident response War Room mode

Why This Is a Compelling Investment
