WHY COLLER CAPITAL

Why Datacendia Aligns with COLLER CAPITAL

Coller Capital invests in secondary pe opportunities. Datacendia is the missing governance layer for enterprise AI.

Your Thesis → Our Mission

Datacendia is the missing decision-evidence layer for enterprise AI — the infrastructure that sits between AI deployment and regulatory compliance. As AI adoption accelerates, every enterprise needs cryptographic proof of AI decisions.

Portfolio Adjacency

✓ Secondary positions globally

coller investment focus aligns with Datacendia. AI governance completes the enterprise stack.

THE PROBLEM

Enterprise AI Has No Decision Evidence Layer

- Every enterprise deploying AI will be required to produce decision evidence under regulatory or legal challenge — and no platform exists to generate it
- EU AI Act (2025–2026) mandates governance for high-risk AI — penalties up to €35M or 7% revenue
- DORA requires AI operational resilience for financial services by Jan 2025
- No widely adopted platform provides cryptographically verifiable decision evidence at the decision level
- Enterprises face regulatory risk with every AI deployment — and have no solution

€35M

85%

Fortune 500 deploying AI

THE SOLUTION

Multi-Agent Deliberation with Cryptographic Evidence

- Multi-agent deliberation with role-specific AI agents (CFO, CISO, Legal, Strategy, Risk, and more)
- Cryptographic decision evidence — Ed25519 signatures, Merkle trees, RFC 3161 timestamps
- Sovereign deployment — Cloud, Private Cloud, On-Premises, and Air-Gapped
- EU AI Act, DORA, GDPR, HIPAA compliance mapping across 23 jurisdictions
- Zero-copy data architecture — data never leaves customer infrastructure
- Open-source core (Apache 2.0) with enterprise features

Key Angle for COLLER CAPITAL

Decision evidence is the next infrastructure default — every enterprise deploying AI will be required to produce decision evidence under regulatory or legal challenge

Sector: Decision Evidence Infrastructure

Our moat: We define the evidentiary artifact that regulators will eventually expect. First to codify it wins the category.

Why This Must Exist Now

EU AI Act (2025–2026) → enforceable auditability requirements. DORA → operational traceability for financial services. Litigation risk → retrospective scrutiny of AI decisions. Enterprise AI adoption → exploding unaudited decision surface. This creates a new infrastructure requirement: decision evidence.

FOUNDER

Stuart Rainey — Founder & CEO

- 7 years as Senior Data Analyst at TCS, embedded with PGIM Fixed Income (\$800B+ AUM)
- Built data infrastructure for regulated investment decisions at institutional scale
- M.S. in Big Data Analytics
- Author of the DDGI framework — ISO/IEC JTC 1/SC 42 standards track
- NVIDIA Inception member

Why This Founder

Built the exact data infrastructure that financial institutions need for AI governance — at one of the world's largest asset managers.

THE ASK

\$1.5M Pre-Seed — \$7M Pre-Money Valuation

What's Built

205K+ passing tests. 156 validated API endpoints. Live production platform at app.datacendia.com.

Traction

Active enterprise design-partner conversations (financial institution, Big 4 channel). NVIDIA Inception member. 3 LOI-stage discussions.

Use of Funds

First 3 design partners signed, SOC 2 Type II certification, regulatory validation (EU AI Act compliance audit).

\$8.5M post-money · 21.5% dilution · Engineering risk resolved — GTM-stage investment.

NEXT STEPS

Let's Talk

Prepared for COLLER CAPITAL — Decision evidence is the next infrastructure default — every enterprise deploying AI will be required to produce decision evidence under regulatory or legal challenge
