THE PROBLEM

What You're Facing Today

- Cloud AI vendors have access to your data and decisions
- CLOUD Act allows US government to compel disclosure
- Switching costs increase with every year of vendor dependency
- No data portability — your intelligence locked in vendor systems
- Vendor pricing increases with no alternative
- Cannot run AI offline or in classified environments

WHAT WE BUILD

Decision Crisis Immunization Infrastructure

Not a chatbot. A system of specialized intelligences that debate, dissent, and decide — with cryptographic proof of every step.

- **Multi-agent deliberation** — 50+ specialized agent presets
- **Cryptographic audit trail** — immutable evidence
- **Zero-copy architecture** — data never leaves your DB
- **Sovereign deployment** — air-gapped to cloud

The Council™

50+ agent presets (CFO, CISO, Risk, Strategy, Legal) deliberate on your data. You get a boardroom debate, not a chatbot answer.

Audit Provenance™

Every decision, vote, dissent — hashed, timestamped, exportable. When the auditor says "prove it," hand them this.
