THE PROBLEM

What You're Facing Today

- Need enterprise AI but don't want infrastructure overhead
- Want fastest possible time to value
- IT team focused on core business, not managing AI platforms
- Need automatic updates and security patches
- Want predictable costs with no surprise infrastructure bills
- Need immediate availability across global teams

WHAT WE BUILD

Decision Crisis Immunization Infrastructure

Not a chatbot. A system of specialized intelligences that debate, dissent, and decide — with cryptographic proof of every step.

- **Multi-agent deliberation** — 50+ specialized agent presets
- **Cryptographic audit trail** — immutable evidence
- **Zero-copy architecture** — data never leaves your DB
- **Sovereign deployment** — air-gapped to cloud

The Council™

50+ agent presets (CFO, CISO, Risk, Strategy, Legal) deliberate on your data. You get a boardroom debate, not a chatbot answer.

Audit Provenance™

Every decision, vote, dissent — hashed, timestamped, exportable. When the auditor says "prove it," hand them this.

YOUR SOLUTION

How Dacendia Solves This

- **Fully managed** — We handle infrastructure, updates, security
- **Hours to deploy** — Connect data sources and start deliberating
- **Automatic scaling** — Handle peak loads without capacity planning
- **Global availability** — Low-latency access worldwide
- **Continuous updates** — New features and security patches automatically
- **Predictable pricing** — Annual license, no infrastructure surprises
