AI Platforms w/ Valuation Evidence

THE PROBLEM

Real Estate AI Creates Discrimination Risk Without Accountability

- AI-assisted valuations with no documented methodology
- EU AI Act classifies creditworthiness and property valuation AI as high-risk
- Fair Housing Act prohibits discriminatory practices — AI can encode bias
- Tenant screening algorithms without explainability
- Investment decisions influenced by AI with no structured deliberation

THE SOLUTION

How Datacendia Solves This

Multi-agent deliberation for valuation, tenant screening, and investment — evidence demonstrating non-discrimination and regulatory compliance.

Key Use Cases

- Property valuation with documented methodology
- Tenant screening Fair Housing-compliant evidence
- Investment analysis with risk/return tradeoffs
- Portfolio management auditable decisions
- Evidence export for housing regulators

Why This Is a Compelling Investment

Property valuation AI is explicitly high-risk under EU AI Act. Fair Housing Act creates liability for discriminatory AI. Firms need governance tooling to deploy AI safely.
