Eliminate Data Silos with Datacendia

Zero-copy architecture — query everywhere without moving anything

Decision Crisis Immunization Infrastructure

THE SILO PROBLEM

THE PROBLEM

What You're Facing Today

- Data scattered across PostgreSQL, MySQL, Oracle, MongoDB, Salesforce, SAP
- ETL pipelines breaking, stale, or months behind
- Data warehouse projects over budget and over time
- Cannot get unified view without massive data integration
- Each department has its own data silo
- Data movement creates compliance and security risks

WHAT WE BUILD

Decision Crisis Immunization Infrastructure

Not a chatbot. A system of specialized intelligences that debate, dissent, and decide — with cryptographic proof of every step.

- **Multi-agent deliberation** — 50+ specialized agent presets
- **Cryptographic audit trail** — immutable evidence
- **Zero-copy architecture** — data never leaves your DB
- **Sovereign deployment** — air-gapped to cloud

The Council™

50+ agent presets (CFO, CISO, Risk, Strategy, Legal) deliberate on your data. You get a boardroom debate, not a chatbot answer.

Audit Provenance™

Every decision, vote, dissent — hashed, timestamped, exportable. When the auditor says "prove it," hand them this.

YOUR SOLUTION

How Dacendia Solves This

- **Zero-copy architecture** — Query data in place, never move it
- **16 production connectors** — PostgreSQL, MySQL, Oracle, MongoDB, Salesforce, SAP, Snowflake, etc.
- **Read-only connections** — Never modify source systems
- **No ETL required** — Direct queries, no pipeline maintenance
- **Cross-database analysis** — Unified intelligence without centralization
- **Compliance-safe** — Data stays in controlled environments
