THE CHALLENGE

AI Decisions in Classified Environments Have Zero Accountability Infrastructure

- **No audit trail** — AI recommendations in C4ISR have no cryptographic proof chain

- **Single-model risk** — one model's hallucination becomes mission-critical error

- **Data sovereignty mandated** — cloud AI violates classification requirements

- **Explainability required** — DoD Responsible AI Strategy demands it

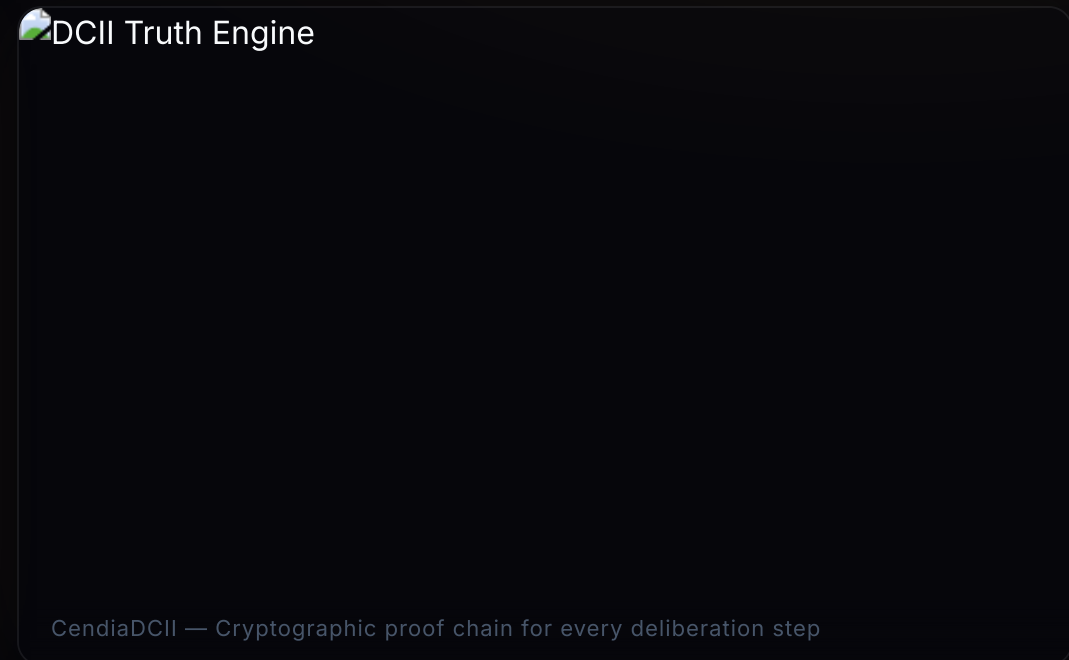

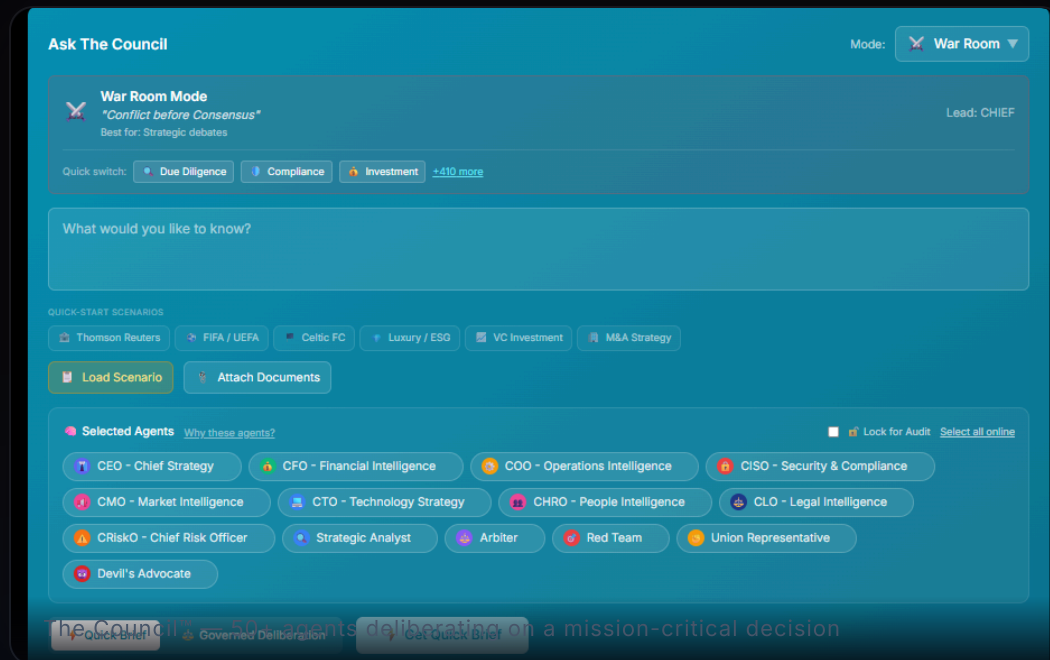

- **Speed vs rigor trade-off** — current tools force one or the other

Deploy Datacendia on a single mission-relevant problem for 90 days. If the Council doesn't identify at least 3 critical risks that your current analysis missed, we refund the pilot fee.

— Datacendia Pilot Guarantee

Multi-agent deliberation with adversarial Red Team analysis consistently surfaces risks that single-model or human-only analysis misses.

MULTI-AGENT
 DECISION
 ENGINE

Decisions Made by Specialized AI Agents — Not One Black Box

- Each decision is deliberated by role-specific agents:
- CFO, CISO, Legal, Strategy, Risk, and more
-
- Every agent provides a confidence score and
- reasoning — dissenting views are preserved, not hidden
-
- War Room, Governed Deliberation, and Quick Brief
- modes adapt to the urgency and stakes of each decision

DECISION AUDIT TRAIL

Every Decision Tracked with Confidence, Agents, and Full Evidence Chain

- Complete decision history — searchable by status, confidence level, agent participation, and date
- Each decision links to the full deliberation record: who participated, what they recommended, and why
- Regulators and auditors can trace any decision back to its evidence and reasoning in seconds
