

PREPARED FOR FUEL VENTURES

DATAENDIA

# Datacendia for FUEL VENTURES

Decision Crisis Immunization Infrastructure

---

Venture Capital · London, UK · \$200M+ AUM

## WHY FUEL VENTURES

# Why Datacendia Aligns with FUEL VENTURES

AI is eating software. fuel-ventures's dedicated AI fund backs infrastructure that becomes the default layer for enterprise AI adoption.

## Your Thesis → Our Mission

Datacendia is the missing governance layer for enterprise AI — the infrastructure that sits between AI deployment and regulatory compliance. As AI adoption accelerates, every enterprise needs cryptographic proof of AI decisions.

## Portfolio Adjacency

- ✓ UK pre-seed B2B
- ✓ Anyscale
- ✓ Hex
- ✓ dbt Labs
- ✓ Replit

fuel-ventures has backed the data stack (UK pre-seed B2B, dbt) and AI infra (Anyscale). Datacendia completes the stack: governance, accountability, and regulatory compliance for every AI decision.

THE PROBLEM

# Enterprise AI Has No Accountability Layer

- AI systems make high-stakes decisions with no audit trail, no evidence, and no dissent tracking
- EU AI Act (2025–2026) mandates governance for high-risk AI — penalties up to €35M or 7% revenue
- DORA requires AI operational resilience for financial services by Jan 2025
- No existing platform provides cryptographic proof of AI-assisted decisions
- Enterprises face regulatory risk with every AI deployment — and have no solution

**€35M**

Max EU AI Act penalty

**0**

Platforms w/ crypto AI evidence

**2025**

EU AI Act high-risk in effect

**85%**

Fortune 500 deploying AI

THE SOLUTION

## Multi-Agent Deliberation with Cryptographic Evidence

- Multi-agent deliberation with role-specific AI agents (CFO, CISO, Legal, Strategy, Risk, and more)
- Cryptographic decision evidence — Ed25519 signatures, Merkle trees, RFC 3161 timestamps
- Sovereign deployment — Cloud, Private Cloud, On-Premises, and Air-Gapped
- EU AI Act, DORA, GDPR, HIPAA compliance mapping across 23 jurisdictions
- Zero-copy data architecture — data never leaves customer infrastructure
- Open-source core (Apache 2.0) with enterprise features

### Key Angle for FUEL VENTURES

#### UK enterprise seed

Sector: AI Infrastructure

### 90-Day Guarantee

Deploy Datacendia for 90 days on a single strategic problem. If the Council doesn't identify at least 3 critical risks you missed, we refund the pilot fee.

| Mar 15, 2026, 08:14 PM                                                                                                                                                                                                                          |           |                  |            |
| The Council recommends proceeding with EU expansion, prioritizing Germany and Netherlands. Risk-adjusted ROI projects 34% within 18 months. Key risks: regulatory compliance (GDPR Article 22), currency exposure, and local hiring timeline.   |           |                  |            |
| Evaluate the acquisition of DataSync Corp for \$12M                                                                                                                                                                                             |           |                  |            |
| Deliberation                                                                                                                                                                                                                                    | Completed | 0.72% confidence | 8 agents   |
| Mar 14, 2026, 08:14 PM                                                                                                                                                                                                                          |           |                  |            |
| Split recommendation: CFO and COO agents favor acquisition for talent and IP. CISO agent flagged 3 critical security vulnerabilities in target codebase. Legal agent noted pending IP litigation. Recommend extending due diligence by 30 days. |           |                  |            |
| What is the optimal pricing strategy for Enterprise tier?                                                                                                                                                                                       |           |                  |            |
| Deliberation                                                                                                                                                                                                                                    | Completed | 0.91% confidence | 5 agents   |
| Mar 13, 2026, 08:14 PM                                                                                                                                                                                                                          |           |                  |            |
| Strong consensus on value-based pricing at \$2,400/seat/year with volume discounts (10+ seats: 15%, 50+: 25%). Projects 28% increase in enterprise pipeline conversion. CMO agent recommends bundling compliance module as differentiator.      |           |                  |            |
| Risk assessment for migrating to multi-region cloud infrastructure                                                                                                                                                                              |           |                  |            |
| Quick Brief                                                                                                                                                                                                                                     | Completed | 0.83% confidence | 7 agents   |
| Mar 12, 2026, 08:14 PM                                                                                                                                                                                                                          |           |                  |            |
| Red team identified 3 critical risks: data sovereignty gaps in APAC region, 340ms latency spikes during cross-region failover, and \$180K/month cost increase. Mitigation plan provided with phased rollout starting US-East → EU-West → APAC.  |           |                  |            |

FOUNDER

## Stuart Rainey — Founder & CEO

- 7 years as Senior Data Analyst at TCS, embedded with PGIM Fixed Income (\$800B+ AUM)
- Built data infrastructure for regulated investment decisions at institutional scale
- M.S. in Big Data Analytics
- Author of the DDGI framework — ISO/IEC JTC 1/SC 42 standards track
- NVIDIA Inception member

### Why This Founder

Built the exact data infrastructure that financial institutions need for AI governance — at one of the world's largest asset managers.

THE ASK

# \$1.5M Pre-Seed — \$7M Pre-Money Valuation

## What's Built

205K+ passing tests. 156 validated API endpoints. Live production platform at [app.datacendia.com](https://app.datacendia.com).

## Traction

2 warm enterprise intros (financial institution, Big 4 channel). NVIDIA Inception member.

## Use of Funds

GTM hiring, SOC 2 Type II certification, first enterprise pilots.

\$8.5M post-money · 21.5% dilution · Engineering risk resolved — GTM-stage investment.
