DELIBERATION PROCESS

How The Council Works

1. **Ingestion** — Connect data sources (zero-copy, read-only)
2. **Agent Activation** — Each agent analyzes from their domain
3. **Deliberation** — Agents debate, challenge, and dissent
4. **Synthesis** — Arbiter resolves conflicts
5. **Evidence** — Full decision packet generated
6. **Export** — PDF + JSON, cryptographically signed

What Makes This Different

- Not ensemble ML — **structured deliberation**
- Not RAG — **multi-perspective reasoning**
- Not prompt chaining — **adversarial challenge**
- Dissent is **logged and protected**
- Every step is **replayable and auditable**
