One-click evidence packets — never scramble for an audit again

Decision Crisis Immunization Infrastructure

THE AUDIT BURDEN

THE PROBLEM

What You're Facing Today

- Audit evidence scattered across emails, spreadsheets, and shared drives
- Manual evidence collection takes weeks for each audit
- Cannot prove who made which decision and why
- No timestamp verification on decision records
- Evidence inconsistencies between departments
- Audit findings increasing year over year

WHAT WE BUILD

Decision Crisis Immunization Infrastructure

Not a chatbot. A system of specialized intelligences that debate, dissent, and decide — with cryptographic proof of every step.

- **Multi-agent deliberation** — 50+ specialized agent presets
- **Cryptographic audit trail** — immutable evidence
- **Zero-copy architecture** — data never leaves your DB
- **Sovereign deployment** — air-gapped to cloud

The Council™

50+ agent presets (CFO, CISO, Risk, Strategy, Legal) deliberate on your data. You get a boardroom debate, not a chatbot answer.

Audit Provenance™

Every decision, vote, dissent — hashed, timestamped, exportable. When the auditor says "prove it," hand them this.

YOUR SOLUTION

How Datacendia Solves This

- **Automatic evidence** — Generated as decisions are made, not retroactively
